SPECIES PAGES FOR 2007 UK BAP PRIORITY SPECIES

(see endnotes for an explanation of the various components of this compilation).

***Cryptocephalus coryli* (Linnaeus, 1758)**

Hazel Pot Beetle

1 General information

Level 1	Terrestrial invertebrates
Level 2	beetle
On 1997 UK BAP list	Species Action Plan

2 UK BAP criteriaⁱ

1. International threat	2. International responsibility (2a) + moderate decline in UK (2b)	3. Marked decline in the UK	4. Other important factor(s)
False	False	False	True

3 Evidence for Criteriaⁱⁱ

Criterion 1	
Criterion 2a	
Criterion 2b	
Criterion 3	
Criterion 4	For a species on the current Priority List, factors that caused the original decline are still operating or the species' population has not recovered to a point where it is likely to be viable in the long term, The geographic range of a species is very restricted AND there is evidence of species decline. This can be interpreted using IUCN categories and criteria.

4 Distribution by Country

England	Scotland	Wales	Northern Ireland	International Waters
Y	N	N	N	

5 Distribution Information

Distribution data source	Stage 1 information, BAP 2005 reporting and NBN Gateway
Distribution data notes	
number of sites (where less than or equal to 10)	
Units used for number	

of sites	
----------	--

6 Actions identified by expertsⁱⁱⁱ

Action number	Action text	Reporting category
1	Appropriate habitat management must continue at the Lincolnshire sites. Further surveys needed at the Surrey, Berkshire and Hampshire sites to establish status.	Species-specific management action
2	Survey is needed to find any new sites, monitoring is needed to understand the status of the species at existing sites. These data are needed to allow reporting against success criteria.	Species-specific monitoring/survey

8 Additional information from specialists^{iv}

Attribute	Value
NBN current scientific name	<i>Cryptocephalus coryli</i>
NBN common name	Hazel Pot Beetle
classification level 1	Terrestrial invertebrates
classification level 2	beetle
Crit 1 Global threat	unknown
Crit 1 European threat	Red listed in Denmark, Germany, Norway & Sweden and possibly others
Crit 1 Supporting info	Noted as being very rare in Spain
Crit 2 % of European popn	3.00%
Crit 2 % of int population Supporting info	occurs in 31 other European countries
Crit 3 Decline %	81
Crit 3 supporting info	81% decline in total number of sites ever recorded
Crit 4 other important factors	Known from 2 sites in Surrey and 4 sites in Lincolnshire, one of which is a reintroduced population. Repeated searching at the Berkshire site has failed to find the beetle and more work is required to establish if this population still exists. The Surrey population appears to be in decline and few individuals have been found over the past few years. Species is a flagship for insect conservation.Meets IUCN Critically Endangered Category.Section: C2. (a) IIJustification: 1.Recent surveys have failed to find individuals at Berkshire site (since 1998)2.Although found in good numbers at Headley Warren (1996-2000) only 5 individuals found (2002-2005). All recent eggs from Surrey females have failed to

	hatch (infertile) indicating possible breeding difficulties due to suspected critically small population.3.No individuals found at Box Hill Site since 19994.Suspected that 90% adult population found at one site – Kirkby Moor, Lincolnshire5.All subpopulations are fragmented
Sources	Hyman, P.S. And Parsons, M.S. (1992) A review of the scarce and threatened Coleoptera of Great Britain. Joint Nature Conservancy Council, Peterborough, England. Piper, R.W. (2002) Conservation biology of Cryptocephalus species and other threatened UK species. PhD thesis, University of Leeds.
Quality	Existing information is reliable. Survey work and PhD research has led to a good understanding of the species requirements.
Criterion(existing bap species)	0

10 Species designations^v

Abbreviation	Reporting Category	Designation	Designation description	Year	Source	Comment
England NERC S.41	Biodiversity Lists - England	England NERC S.41	Species “of principal importance for the purpose of conserving biodiversity” covered under section 41 (England) of the NERC Act (2006) and therefore need to be taken into consideration by a public body when performing any of its functions with a view to conserving biodiversity.	2008	Natural Environment and Rural Communities Act 2006 - Species of Principal Importance in England (section 41) and Wales (section 42)	Geographic constraint=Listing is for England only
BAP:2007	Biodiversity Action Plan UK list of priority species	Priority Species	The UK List of Priority Species and Habitats contains 1150 species and 65 habitats that have been listed as priorities for conservation action under the UK Biodiversity Action Plan (UK BAP).	2007	UK list of Priority Habitats and Species	status on former BAP list: Species Action Plan
RedList_GB_Pre94:EN	Red Listing based on pre 1994 IUCN guidelines	Endangered	Taxa in danger of extinction and whose survival is unlikely if the causal factors continue operating. Superseded by new IUCN categories in 1994, but still applicable to lists that have not been reviewed since 1994.	1992	A review of the scarce and threatened beetles of Great Britain Part 1 (Hyman, P.S. revised and updated by M.S. Parsons.)	pre 1994 IUCN criteria

UK BAP 2008 reporting^{vi}

(nb this only applies to species on the original 1997 UK BAP priority species list)

7 Successes

Success text	Success category 1	Success category 2	England	NI	Scotland	Wales	Edits by reporting group
No report received							Species for which no report was received

8 Threats

Threat category 1	Threat category 2	England	NI	Scotland	Wales	Edits made by reporting group
No report received	No report received					Species for which no report was received

15 Constraints

Rank	Constraint category 1	Constraint category 2	Constraint summary	England	NI	Scotland	Wales	Solution category	Solution summary
	No report received		No report received					No report received	

9 State of Knowledge

State of knowledge category	Notes	Edits made by reporting group
No report received		Species for which no report was received

ENDNOTES

ⁱ An explanation of these criteria is included at Annex 3 of [UK Biodiversity Action Plan: Report on the Species and Habitat Review](#). BRIG (ed. Ant Maddock) 2007. This review was organised in two stages. Stage 1 looked at the scientific evidence for selecting the UK List of Priority Species and Habitats while stage 2 considered the conservation action needed for these species and habitats and provided signposts to the means of implementing action.

ⁱⁱ The information on evidence and the species distribution is as presented on the UK BAP website. Users can download a spreadsheet of the [Stage 1 species evidence](#) from the home page of the UK BAP website.

ⁱⁱⁱ Actions were assigned to each and every priority species by expert groups convened at Stage 2 of the Review process. These were subsequently categorised into “signpost categories”. This information is as shown on the UK BAP website See the link for [categorisation \(signposting\) of UK priority species](#).

^{iv} This information has been derived from Stage 1 of the priority species review, and is presented in the “marine”, “terrestrial invertebrates” and “other terrestrial species” sheets within the spreadsheet of the [Stage 1 species evidence](#). The information presented here varies according to the taxonomic group. Please note that some of these data have been written for other Expert Group members and may not be of great value to a wider audience.

^v Information on conservation designations has been extracted from JNCC’s collation of information on [species designations](#). The designations shown in version 2 of these pages are as at December 2010.

^{vi} As part of the 2008 UK BAP reporting round lead partners of national plans were asked to answer a number of specific questions. The data will be analysed and used for the UK and country level reports. All of the responses provided through BARS as part of the 2008 reporting exercise are available to [download](#). Note that in the December 2010 version of these pages (version 2) includes corrections to previously truncated text fields.
