

Sub-model 1. Macroalgae

- 1. Regional to Global Drivers
- 2. Water Column Processes
- 3. Local Processes/Inputs at the Seabed
- 4. Habitat and Biological Assemblage
- 5. Output Processes
- 6. Local Ecosystem Functions
- 7. Regional to Global Ecosystem Functions

Legend

Magnitude of Influence

- Small
- Medium
- Large
- Driving Influence

Interaction Type

- Positive Interaction
- Negative Interaction
- Feedback

Driver Relevance to Infralittoral/Circalittoral

- Low Relevance Infralittoral
- High Relevance Infralittoral
- Low Relevance Circalittoral
- High Relevance Circalittoral

Degree of Natural Variability

- Low natural variability
- Moderate natural variability
- High natural variability

Version 1.0
Please see accompanying report for model restrictions and limitations
