

**European Community Directive
on the Conservation of Natural Habitats
and of Wild Fauna and Flora
(92/43/EEC)**

**Second Report by the United Kingdom under
Article 17
on the implementation of the Directive
from January 2001 to December 2006**

**Conservation status assessment for
Habitat:
H2160 - Dunes with *Hippophae rhamnoides***

The information in this assessment corresponds to the "habitat fact sheet" submitted by the UK to the European Union in February 2008 (second and final submission). Please note that this is a section of the UK's report. For the complete report visit <http://www.jncc.gov.uk/article17>

Please cite as: Joint Nature Conservation Committee. 2007. *Second Report by the UK under Article 17 on the implementation of the Habitats Directive from January 2001 to December 2006*. Peterborough: JNCC. Available from: www.jncc.gov.uk/article17

Habitat Name: Dunes with *Hippophae rhamnoides*

1. National level

Habitat Code H2160

Member State UK

Biogeographic regions concerned within the MS ATL

1.1 Habitat range map

1.2 Habitat distribution map

2. Biogeographic level

2.1 Biogeographic region or marine region

2.3 Range of the habitat within the Biogeographic or marine region	
2.3.1 Surface area of range in square km	290
2.3.2 Date of range determination	05/2007
2.3.3 Quality of data concerning range	Moderate
2.3.4 Range trend	Stable (=)
2.3.5 Range trend magnitude in %	Not applicable
2.3.6 Range trend period	1958-2006
2.3.7 Reasons for reported trend	Not applicable
2.4 Area covered by habitat type within the range in the biogeographical region concerned.	
2.4.1 Surface area of the habitat type (sq km)	2.35
2.4.2 Date of area estimation	05/2007
2.4.3 Method used for area estimation	3 - Ground based survey
2.4.4 Quality of data on area	Moderate
2.4.5 Area trend	Increasing (+)
2.4.6 Area trend magnitude in %	Unknown
2.4.7 Area trend period	1950-2006
2.4.8 Reasons for reported trend	5 - Natural processes;
2.4.9 Justification of % thresholds for trends (optional)	Not applicable
2.4.10 Main pressures	102 - Mowing / Cutting; 702 - air pollution; 950 - Biocenotic evolution; 990 - Other natural processes;
2.4.11 Threats	102 - Mowing / Cutting; 702 - air pollution; 950 - Biocenotic evolution; 990 - Other natural processes;
Complementary information	
2.5.1 Favourable reference range (sq km)	290
2.5.2 Favourable reference area (sq km)	2.35
2.5.3 Typical species	<i>Hippophae rhamnoides</i> ;
2.5.4 Typical species assessment	Change in 10km square occupancy over last 25yrs
2.5.5 Other relevant information	
2.6 Conclusions (assessment of conservation status at end of reporting period)	

(2.3) Range	(FV) - Favourable
(2.4) Area	(FV) - Favourable
(2.5) Specific structures and functions (incl. typical species)	(FV) - Favourable
Future prospects	(FV) - Favourable
Overall assessment	(FV) - Favourable
