

**European Community Directive  
on the Conservation of Natural Habitats  
and of Wild Fauna and Flora  
(92/43/EEC)**

**Second Report by the United Kingdom under  
Article 17  
on the implementation of the Directive  
from January 2001 to December 2006**

**Conservation status assessment for  
Habitat:**

**H3130 - Oligotrophic to mesotrophic standing  
waters with vegetation of the *Littorelletea  
uniflorae* and/or of the *Isoëto-Nanojuncetea***

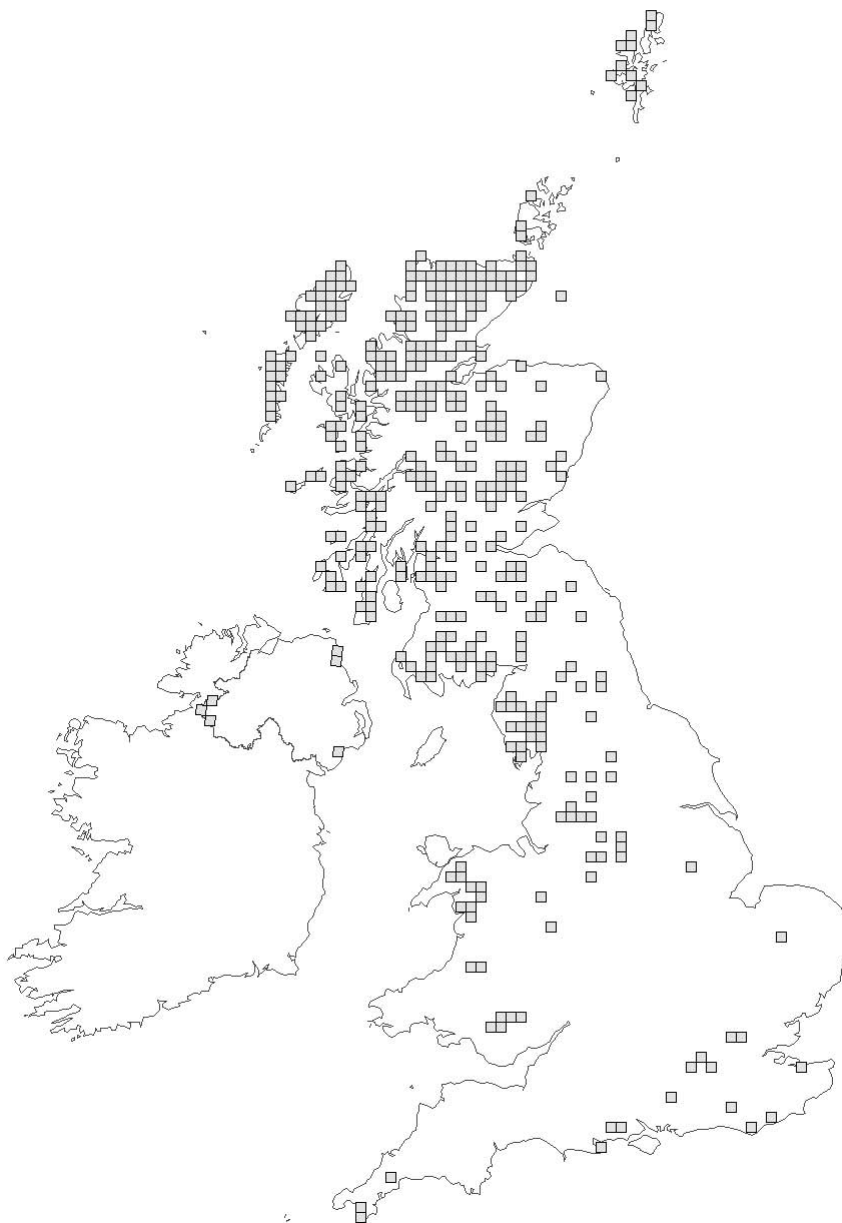

The information in this assessment corresponds to the "habitat fact sheet" submitted by the UK to the European Union in February 2008 (second and final submission). Please note that this is a section of the UK's report. For the complete report visit <http://www.jncc.gov.uk/article17>

### 2.3 Range of the habitat within the Biogeographic or marine region

2.3.1 Surface area of range in square km

95334

2.3.2 Date of range determination

05/2007

2.3.3 Quality of data concerning range	Moderate
2.3.4 Range trend	Stable (=)
2.3.5 Range trend magnitude in %	Not applicable
2.3.6 Range trend period	1994-2006
2.3.7 Reasons for reported trend	Not applicable
<b>2.4 Area covered by habitat type within the range in the biogeographical region concerned.</b>	
2.4.1 Surface area of the habitat type (sq km)	1500
2.4.2 Date of area estimation	05/2007
2.4.3 Method used for area estimation	1 - Only or mostly based on expert opinion
2.4.4 Quality of data on area	Poor
2.4.5 Area trend	Unknown (X)
2.4.6 Area trend magnitude in %	Not applicable
2.4.7 Area trend period	1994-2006
2.4.8 Reasons for reported trend	Not applicable
2.4.9 Justification of % thresholds for trends (optional)	Not applicable
2.4.10 Main pressures	421 - disposal of household waste; 702 - air pollution; 853 - management of water levels; 890 - Other human induced changes in hydraulic conditions; 952 - eutrophication; 954 - invasion by a species; 971 - competition;
2.4.11 Threats	421 - disposal of household waste; 702 - air pollution; 853 - management of water levels; 890 - Other human induced changes in hydraulic conditions; 952 - eutrophication; 954 - invasion by a species; 971 - competition;
<b>Complementary information</b>	
2.5.1 Favourable reference range (sq km)	95334
2.5.2 Favourable reference area (sq km)	Unknown
2.5.3 Typical species	none listed
2.5.4 Typical species assessment	Not applicable
2.5.5 Other relevant information	
<b>2.6 Conclusions (assessment of conservation status at end of reporting period)</b>	
(2.3) Range	(FV) - Favourable
(2.4) Area	(XX) - Unknown
(2.5) Specific structures and functions (incl. typical species)	(U1) - Inadequate
Future prospects	(U1+) - Inadequate but improving
Overall assessment	(U1+) - Inadequate but improving
