

**European Community Directive  
on the Conservation of Natural Habitats  
and of Wild Fauna and Flora  
(92/43/EEC)**

**Second Report by the United Kingdom under  
Article 17  
on the implementation of the Directive  
from January 2001 to December 2006**

**Conservation status assessment for  
Species:  
S1261 - *Lacerta agilis* - Sand lizard**

The information in this assessment corresponds to the "species fact sheet" submitted by the UK to the European Union in February 2008 (second and final submission). Please note that this is a section of the UK's report. For the complete report visit <http://www.jncc.gov.uk/article17>

| 1.1 Range map   |  A map of the United Kingdom showing the distribution of <i>Lacerta agilis</i> . The map includes the main islands of Great Britain and Ireland, as well as the Channel Islands and the Shetland Islands. The distribution is indicated by shaded areas: a large shaded region in the south of England, a smaller shaded area in the south of Wales, and several small shaded patches in the south of Scotland. The rest of the map is unshaded, indicating no recorded presence of the species in those areas. |

| 2.4.3 Method used for population estimation                              | 3 - From comprehensive inventory   |                       |         |     |
| 2.4.4 Quality of population data   | Good   |                       |         |     |
| 2.4.5 Population trend   | Stable (=)   |                       |         |     |
| 2.4.6 Population trend magnitude (%)                                     | Not applicable   |                       |         |     |
| 2.4.7 Population trend period  | 1994-2006  |                       |         |     |
| 2.4.8 Reasons for reported trend   | Not applicable   |                       |         |     |
| 2.4.9 Justification of % thresholds for trends (optional)                | Not applicable   |                       |         |     |
| 2.4.10 Main pressures  | 100 - Cultivation; 160 - General Forestry management; 161 - Planting; 300 - Sand and gravel extraction; 400 - Urbanised areas, human habitation; 410 - Industrial or commercial areas; 500 - Communication networks; 601 - golf course; 608 - camping and caravans; 800 - Landfill, land reclamation and drying out, general; 976 - damage by game species;  |                       |         |     |
| 2.4.11 Threats   | 101 - Modification of cultivation practices; 390 - Mining and extraction activities not referred to above; 400 - Urbanised areas, human habitation; 410 - Industrial or commercial areas; 500 - Communication networks; 800 - Landfill, land reclamation and drying out, general; 853 - management of water levels; 910 - Silting up; 920 - Drying out; 950 - Biocenotic evolution; 965 - predation; 976 - damage by game species;   |                       |         |     |

| <b>2.5 Habitat for the species in the biogeographic region or marine region</b>                 |  |
|---|--|
| 2.5 Habitats for the species  | In the UK the sand lizard is only found on southern, dry heathland and its recent derivatives, and coastal sand dunes. Sand lizard is constrained to drier and sandier soils for breeding and hibernation though it will occupy adjacent habitats, e.g. for dispersal and feeding. |
| 2.5.2 Area estimation (sq km)   | 35   |
| 2.5.3 Date of estimation  | 2005   |
| 2.5.4 Quality of data   | Good   |
| 2.5.5 Trend of the habitat  | Stable (=)   |
| 2.5.6 Trend period  | 1994-2006  |
| 2.5.7 Reasons for reported trend  | Not applicable   |
| <b>2.6 Future prospects</b>   |  |
| 2.6 Future prospects for the species  | Good prospects_Species expected to survive and prosper   |
| <b>2.7 Complementary information</b>  |  |
| 2.7.1 Favourable reference range (sq km)  | 9833   |
| 2.7.2 Favourable reference population   | 645  |
| 2.7.3 Suitable Habitat for the species  | Unknown  |
| 2.7.4 Other relevant information  |  |
| <b>2.8 Conclusions</b><br><i>(assessment of conservation status at end of reporting period)</i> |  |
| (2.3) Range   | (U1+) - Inadequate but improving   |
| (2.4) Population  | (U1+) - Inadequate but improving   |
| (2.5) Habitat for the species   | (U1) - Inadequate  |
| (2.6) Future prospects  | (FV) - Favourable  |
| Overall assessment  | (U1+) - Inadequate but improving   |
