

**European Community Directive
on the Conservation of Natural Habitats
and of Wild Fauna and Flora
(92/43/EEC)**

**Second Report by the United Kingdom under
Article 17
on the implementation of the Directive
from January 2001 to December 2006**

**Conservation status assessment for
Species:
S1357 - *Martes martes* - Pine marten**

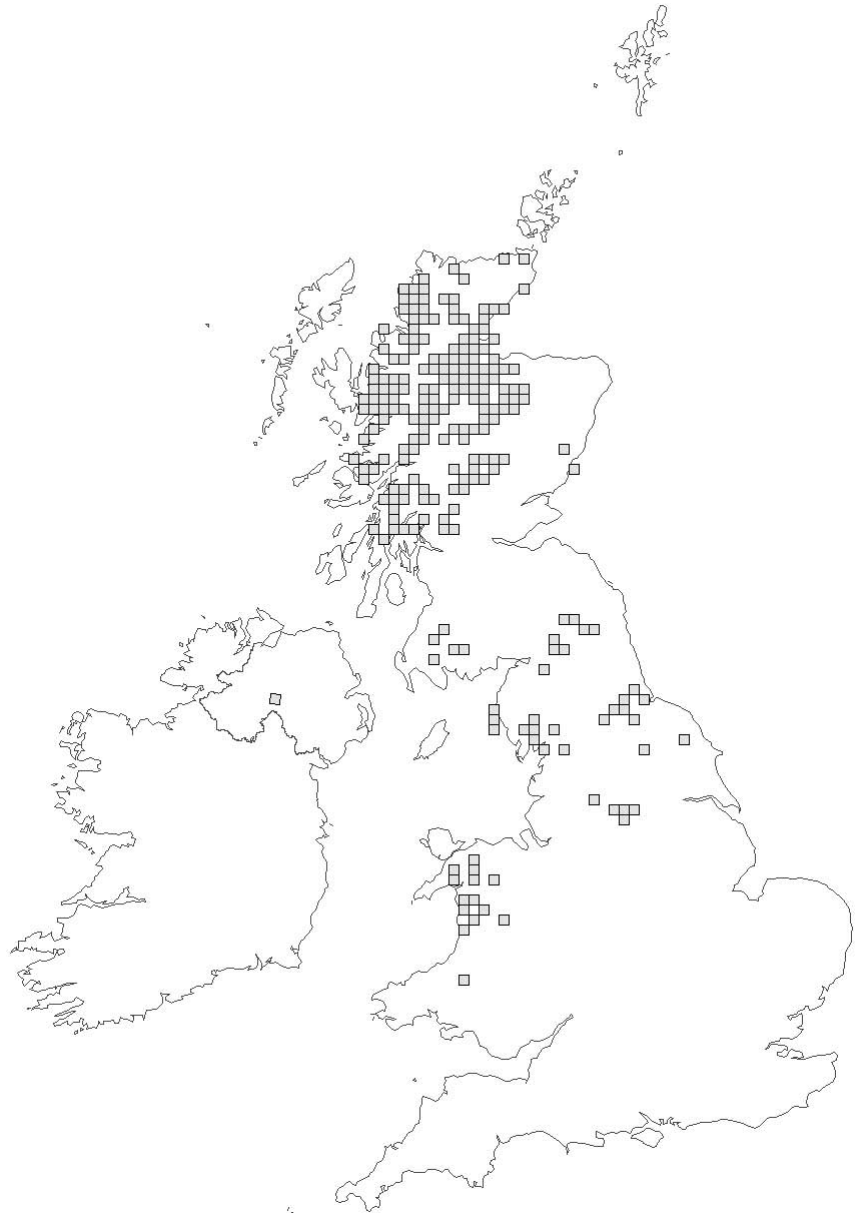

The information in this assessment corresponds to the "species fact sheet" submitted by the UK to the European Union in February 2008 (second and final submission). Please note that this is a section of the UK's report. For the complete report visit <http://www.jncc.gov.uk/article17>

Please cite as: Joint Nature Conservation Committee. 2007. *Second Report by the UK under Article 17 on the implementation of the Habitats Directive from January 2001 to December 2006*. Peterborough: JNCC. Available from: www.jncc.gov.uk/article17

Species Name: *Martes martes*

1. National level	
Species Code	S1357
Member State	United Kingdom
Biogeographic regions concerned within the Member state	ATL
1.1 Range map	 A map of the United Kingdom showing the distribution of <i>Martes martes</i> . The distribution is indicated by shaded areas in grey. The shaded regions include: the Scottish Highlands and parts of the Scottish Islands; the Pennine region in northern England; a large area in the Midlands and eastern England; and a smaller area in the south of England. The map also shows the outline of Ireland and the Channel Islands.

2.3 Range of species in the biogeographic region or marine region				
2.3.1 Surface range of the species (sq km)	69036			
2.3.2 Date of range determination	1990-2006			
2.3.3 Quality of data concerning range	Moderate			
2.3.4 Range trend	Increasing (+)			
2.3.5 Range trend magnitude (%)	Unknown			
2.3.6 Range trend period	1982-2004			
2.3.7 Reasons for reported trend	3 - Direct human influence;			
2.4 Population				
2.4.1 Population size estimation	Minimum	3500	Maximum	Unknown
	Units	Individuals		
2.4.2 Date of population estimation	2004			
2.4.3 Method used for population estimation	1 - Based on expert opinion			
2.4.4 Quality of population data	Moderate			
2.4.5 Population trend	Increasing (+)			
2.4.6 Population trend magnitude (%)	35			
2.4.7 Population trend period	1994-2004			
2.4.8 Reasons for reported trend	3 - Direct human influence;			
2.4.9 Justification of % thresholds for trends (optional)	Not applicable			
2.4.10 Main pressures	160 - General Forestry management; 166 - Removal of dead and dying trees; 167 - Exploitation without replanting; 243 - trapping, poisoning, poaching;			
2.4.11 Threats	160 - General Forestry management; 166 - Removal of dead and dying trees; 167 - Exploitation without replanting; 243 - trapping, poisoning, poaching;			
2.5 Habitat for the species in the biogeographic region or marine region				
2.5 Habitats for the species	<i>M. martes</i> is generally found in deciduous and coniferous forest and rocky			

	areas, but also lives alongside human habitation, occupying wood stacks, farm buildings and loft spaces (Macdonald & Tattersall 2001). Scarcity of arboreal cavities may result in a shortage of suitable den sites and could in turn limit populations (Birks et al. 2005).
2.5.2 Area estimation (sq km)	Unknown
2.5.3 Date of estimation	05/2007
2.5.4 Quality of data	Poor
2.5.5 Trend of the habitat	Increasing (+)
2.5.6 Trend period	1990-1998
2.5.7 Reasons for reported trend	3 - Direct human influence;
2.6 Future prospects	
2.6 Future prospects for the species	Good prospects_Species expected to survive and prosper
2.7 Complementary information	
2.7.1 Favourable reference range (sq km)	69036
2.7.2 Favourable reference population	2600
2.7.3 Suitable Habitat for the species	Unknown
2.7.4 Other relevant information	
2.8 Conclusions <i>(assessment of conservation status at end of reporting period)</i>	
(2.3) Range	(FV) - Favourable
(2.4) Population	(FV) - Favourable
(2.5) Habitat for the species	(XX) - Unknown
(2.6) Future prospects	(FV) - Favourable
Overall assessment	(FV) - Favourable
