During the breeding season the area regularly supports:

Aquila chrysaetos

1.8% of the GB breeding population
Count, as at 1992

ARTICLE 4.2 QUALIFICATION (79/409/EEC)

4.3 Vulnerability

Maintenance of the size and productivity of the golden eagle population is dependant upon the availability of adequate food (winter carrion and live prey) and the minimisation of disturbance. SNH will continue to monitor the population and its response to changes in land management.
